

# Global chemicals firm using EPAS for security and compliance

**Firm size: \$30B+**

“ Great Solution For Password Analysis And Quality Enforcement ”

“ Fast and very competent service and support, the best of any vendor I experienced so far. ”

IT Security and Risk Management Manager

## OVERVIEW

The customer needed to meet a variety of requirements for critical infrastructure across multiple continents, as well as improve cyber resilience by strengthening authentication.

## SOLUTION

EPAS has been running without interruption since 2019, ensuring that passwords are secure and providing regulatory evidence in this respect. Quoting the project owner, “The functionality of EPAS is impressive. Integration and rollout were trouble-free, despite a very complex environment.”

## CONCLUSION

“Ask for a test of the solution. It is very likely that the results will satisfy you and provide you with substantive evidence to justify the need for the solution towards senior management.”
